

PRESS RELEASE

Dreampark Enters the Latvian IPTV Market with LIVAS

NORRKÖPING, Sweden – September 8, 2009 – Dreampark, one of the leading IPTV middleware providers on the European market, today announced its first customer in Latvia. LIVAS Telecommunications, a provider of TV and broadband services on the Latvian market, has chosen the Dreampark Middleware solution Dreamgallery™. This contract further expands Dreampark's presence and growth in Central and Eastern Europe and illustrates Dreampark's position as the leading IPTV middleware provider in Europe.

LIVAS Telecommunications chose Dreampark's middleware solution due to its speed, flexibility and user-friendliness.

"LIVAS Telecommunications mission is to provide its customers with a superior TV experience and this is the reason we selected Dreampark as our IPTV middleware platform," said Alexandr Pavlov, CTO, LIVAS Telecommunications. "We look forward to delivering a feature rich, user-friendly and graphically appealing TV service and this is accomplished with the Dreamgallery middleware solution. Dreampark is market leader within the middleware space and their innovation gives us confidence we can deliver the best TV experience to our customers in an ever changing marketplace."

"We are proud that LIVAS Telecommunications has chosen Dreampark and we are confident this partnership will successfully meet LIVAS Telecommunication's goal of satisfying and increasing its IPTV subscribers throughout Latvia," says Per Skyttvall, CEO, Dreampark. "We look forward to working closely with LIVAS Telecommunications to ensure their success in the IPTV space throughout Latvia."

About Dreampark

Dreamgallery™ is the most deployed IPTV middleware in Europe. Clients include Boxer, Canal Digital, Dansk Bredband, Magnet Networks, Teracom and Viasat.
