

FOR IMMEDIATE RELEASE

A Dream-Come-True for SVG Fans: Opera and Dreampark Team to Improve SVG in Opera Devices SDK

Oslo, Norway – September 10, 2009 - Opera Software today announced that it has renewed its partnership with Dreampark, one of the leading IPTV middleware providers to the European market.

Together, the two companies will focus on the needs of an ever-expanding IPTV market with the promise of a better user experience and steadfast standards compliance. As part of their cooperation, Opera and Dreampark will collaborate to perfect the performance of Dreampark's SVG-based middleware on the Opera Devices SDK.

"By pooling our experience, innovations and knowledge with an IPTV leader such as Dreampark, we are better able to meet the growing demand from IPTV industry players. The goal with the renewed partnership is to deliver a fully optimized combination of our technologies, giving customers a flexible, scalable and user-friendly IPTV solution," said Christen Krogh, chief development officer, Opera Software. "Dreampark is extremely experienced in working with the "living room environment" and its software suite, Dreamgallery, is a leading solution that tops the European IPTV market."

"Both Opera and Dreampark share the core values of openness and flexibility. It's this commitment that has brought our two companies together," said Björn Lang, chief technology officer, Dreampark. "Opera has long been a pioneer in the IPTV space, and their SDK has offered full-fledged SVG support for years. Now, with Dreampark's SVG suite as a part of their package, they are able to expand this offering to meet our customers more advanced, interactive graphical needs."

Come see Opera and Dreampark at IBC 2009 in Amsterdam. Opera at Booth 3. C11 and Dreampark in Booth 4.B70.

About Opera Software ASA

Opera Software ASA has redefined Web browsing for PCs, mobile phones and other networked devices. About Dreampark

Dreampark's Dreamgallery™ is the most deployed IPTV middleware in Europe. Dreamgallery is a robust and revenue-generating solution delivered to some of the world's first commercial IPTV deployments. Clients include Boxer, Canal Digital, Dansk Bredbånd, Magnet Networks, Teracom and ViaSat.

Dreamgallery maximizes operator flexibility by taking advantage of the powers of the HTML and SVG standard. It is the natural choice for operators wishing to move faster than the competition in order to create unique differentiators, and who want to base their solutions on standards rather than being locked in to a proprietary platform. The offline administrations module gives operators full control of their TV portals and provides the necessary tools to set up interactive services without the need of consultants. Graphical flexibility is virtually unlimited thanks to the concept of generating pictures out of templates on the server side.

Dreampark's strong commitment to provide the best performing browser-based client on the market is based on end user research and has resulted in a unique combination of outstanding user friendliness, openness, flexibility and TV application feel.
